

RESIDENCES AND BUSINESSES

SAVE BIG ON INSTALLING YOUR HEAT PUMP SYSTEM NOW!

INCENTIVES AVAILABLE FROM CITY OF GUSTAVUS AND AP&T.

Up To \$1000 PER INSTALLATION!

This fall is a great time to order and install a heat pump system for your home, business, or agency office. Alaska Power and Telephone offers a [\\$500 incentive](#) for installation of one heat pump system per customer location in Gustavus.

Score twice! Collect a second \$500 incentive from the [separate City of Gustavus heat pump installation incentive program](#) funded by a grant from the National League of Cities. Apply [here](#).

The City of Gustavus program incentivizes up to three heat pump installations per location. So, if you are a homeowner or business with multiple cabins or outbuildings you can qualify for up to \$1500 from the City program.

The City web page lists heat pump suppliers and installers. There are do-it-yourself systems available that don't require a specialized contractor.

Score a Federal tax credit, too! Information [here](#). Credits are up to \$2000 for qualifying heat pump installations at residences. See the "Energy Property" section for qualifying equipment.

To learn more, please visit the system we installed at City Hall.

The do-it-yourself system installed at City Hall features one outdoor compressor unit and two indoor discharge units. The system heats both front and rear sections of the building comfortably even on very cold winter days.

Install your system now and claim your incentives and tax credits. The City program runs through January, but we are seeking to extend it into the spring.
