Small and Medium Businesses Webinar Series

Cybersecurity Awareness Month

The Cybersecurity and Infrastructure Security Agency (CISA) in partnership with the IT SCC (Sector Coordinating Council) invite you to participate in a webinar discussion series focused on SMBs (Small and Medium sized Businesses) for cybersecurity awareness month! For 2024 we are centering the conversation around Artificial Intelligence and its influence throughout the sectors. The discussions throughout this series will discuss different aspects of AI, understanding how it could affect your environment, what the research community is developing and seeing, and what to expect moving forward when discussing AI safety.

REGISTRATION

To learn more and register for each event, please follow the links below.

Week 1: State of Critical Infrastructure SMB Cyber Registration

Week 2: AI Foundations: Building a Strong Baseline for Critical Infrastructure SMBs Registration

Week 3: AI Unlocked: Must Know Principles and Game-Changing Guidelines Registration

Week 4: Resource Vault: Strengthen Your SMB's Critical Infrastructure Registration

WHO SHOULD ATTEND?

Small and medium sized businesses working in and adjacent to critical infrastructure environments. While the focus of the content will be centered around small and medium businesses there are prominent discussions happening that will provide value to businesses of any size. Discussions around safety effect all sized businesses and citizens due to the interconnectivity of IT environments. This effort stems from the IT sector and will maintain that origin within the discussions but due to the vastness of the sector, we encourage all 16 critical infrastructure sectors to attend and receive the value from attending.
